WASHINGTON, Sept. 22. (Exclusive)-At least \$4,000,-000 and probably \$5,000,000, will be required by the Red Cross for the relief of refugees in the hurricane stricken districts of Florida, it was announced tonight by John Barton Payne, ch virman of the organization, after a preliminary survey of the needs indicated in the reports of field workers now on the scene'. Approximately \$1,000,000 already has been contributed throug bout the country but this amount, Mr. Payne declares, is not nearly adequate in view of the fact that as many as 50,-000 peop. are homeless in addition to the at least 4000 injured.

O00 people are homelens in addition to the at least 4000 injured. In Miam's alone, he continued, caumber of physicians and nurses and 1200 persons are in the regular nospitals and 1 to in Emergency nepitals, 500 of them with 'major tractures and maky more with laser fractures. This type of injury will require expert o by and extended hospitalization, if the victims are not to be crippled for live, he points out.

### POSTAL TELEGRAPH FIRST TO OPEN WIRE

The Postal Telegraph Company was
the first of the communication companies to re-establish contact hetween Miami and the rest of the
country when its linemen succeeded
in getting a wire through to the
stricken city resterday. The wire wasimmediately put into service with
Jacksonville by means of high-speet
automatic telegraph machines and
commercial service into and out of
Miami was at once begun last night.
The company's cable between Miami
and Havana, Cuba, was recovered for
service. The cable which runs into
Miami over the several mile long
causeway between Miami and Miami
Peach, had been out of commission
because of several breaks in the
causeway, and this had left the only
direct means of communication with
Havana, the New York-Havana cable, operated by the Postal Commercial Cables system. Re-establishment
of the cable service furnishes another
means for communication between

"The Presidency has its very pleasant aspecta," he concluded. "Perhaps the most enjoyable of the President's duties consists in meeting the people in the ordinary walks of life with whom he comes in contact. It is by that method in my own case, and the life of my youth, that I keep in touch with the needs and ideals of the publi. There is, of course, a great sense of uplift and support in the knowledge that one has behind him the confidence and friendship of the people of a great nation. Beyond that there is the inspiration of religious faith. I have always attended church regularly when I could, but, there being no organized church in our town when I was a boy, I had not joined a church. After I became President, the First Congregational Church of Washington, without consulting me, voted to make me a member. I was pleased that they took such action and, of course, accepted the election to memberalip which they offered me. My boys joined the church at an early age, and my wife had long been a member of the church.

ATLANTIC CITY (N. J.) Sept. "I'm going to fight like hell. I'll knock Tunney out with the first punch if I can because I know he'll be trying to do the same to me, and my idea all the time is to beat the other fellow to it. In this game, particularly, that is the best policy. I've always followed it. When you think of it, boxing is a sweet game. It's the only game. I get a lot of fun out of it; there's a kick in it for me every second of the time I'm inside the ropes and in this game what you do inside the ropes is the big thing—the thing that counts. I'm ready now to do my stuff inside the ropes and I'll be ready tomorrow night when I face Tunney across the ring." "I'm going to fight like hell. I'll

For two days crowded trains from every part of the continent have been thundering into Philadelphis with excited and jabbering partisans from both camps.

There will be the governors of eight States at the ringside.

There will be judgec and diplomats and leading bankers of America. Why not? This championship has been more of a legal battle than a physical one. It has produced over 500 injunctions where Rickard, the promoter; Dempsey, the champion, and Gibson, the challenger's manager, have been served with enough papers to deplete a Canadian forest of pulp. As for the bankers, Dempsey will draw \$700,000 for his share and Tunney \$200,000, and if this is not the spot for a banker to sit, there is no such spot.

With but two days remaining be fore the game with Stanford at Palo Alto, Coach Pox Stanton is rapidly whipping his Caltech Engineers into shape. The line is well taken care

shape. The line is well taken care of by at least one good candidate for every position, but the backfield will have to be formed by more or less inexperienced players, with the exception of Capt. Layton Stanton and Ray Copeland.

There is weight in plenty for the line, with E. Joujon-Roche, 210-pound tackle, bringing the average up to around 128 pounds. As for the backfield, it will be lacking in weight, but will be one of the fastest in the conference.

The starting line-up for the Stan-

ference.

The starting line-up for the Stanford game has not been announced, but some of the positions are pretty sure to be filled by vetrans of last year's team. Stanton and Muff will probably be the halfbacks, with Ray Copeland at quarter, and either Watson or Shields at full. On the line, Jones, Peterson, Exiey, Lombard and George are the ends Coach Stanton can call upon, while Joujon-Roche, Mohr, Heilbron, Collins and Mohr may all go in as tackles. Polsom and Lewis will probably start in the guard positions, with either Nickel or Penwick at center.

MARRISON

NILL HENRY A FTER closely perusing the evidence submitted by Mr. Braven Dyer, the distin-

guished football expert, we have arrived at the conclusion that Mr. Dyer and anybody else is crazy who attempts to pick a champion of the Southern California
Conference in advance. In fact,
we'd almost be willing to wager a
sheckel or so that no team
goes through the conference
race undefeated. That doesn't
mean that there won't be an
out-and-out champion, but it
does mean that the competition
is going to be so red hot and the
teams will have to play so many
tough opponents that they are
all presty sure to get bumped
of by one of them.

ference is to say that the only team we know much about, the Trojans, ought to be better than last year. Since the Trojans, in streaks, were better than anybody else on the Coast last year, that means that they ought to be awfully good this year. However, for the past three seasons the Trojans have shown overwhelming promise at the start of the season only to bog down once or twice, so you never can tell.

One prediction we'd like to make hasn't anything whatsoever to do with the outcome of any particular race, but it does have to do with the situation in Southern California it is our firm belief that the time when there is only one football team in Southern California is reaching its close. For half a dozen seasons the Trojans have been capable of overwhelming everybody in sight down here—not only beating them but winning by from three or four touchdowns to a dozen. We believe that they reached the height of their supremacy last season and that from now on, while they may be expected to be the outstanding team, the margin of vaperiority will grow less.

That doesn't mean that the Trojans are going to be weaker at all—far from it. It does mean that the other teams are going to be very much stronger in proportion than they have been and that three or four years from now there will be several teams down here capable of making it very interesting for the hig teams from Troy. All of which will be good for football.

Most of this catacitymic outpouring will be for Tunney, the challenger, and just what reception Dempeey will get is still in the mysterious uncertainty of all great crowds. He will get a certain share of applause, part due to sympathy aroused by what many consider to be persecution. But there will be many notes flavored with the essence of the wild respherry and attuned with the echo of the anvil chorus in full blast. Tunney's general demeanor in these first few seconds after reaching the ring will give something of a line on his chance to win or make a fairly even fight.

STATE HIGHWAYS

We believe that the building of our new State roads should again be resumed in California, and that our State highway system should be pushed forward to completion. Experience has taught that it is more economical to build good permanent roads than it is to do without them. The investment of the State in her highways is too great, and they are too important to her growth and proeperity, to permit the present inaction to continue. In the completion of our highway system, care action to continue. In the comple-tion of our highway system, care should be taken to cut down the over-head to the lowest possible point con-sistent with the securing of efficient supervision, so that, of the road money available, every dollar possible shall go into the roads themselves. We recommend that the departure be made of budgeting the expenditures of the highway department, just as is done with all other departments of the State, to the end that due notice shall be given to the public as to proposed expenditures of highway funds.

RELIEF CAMPAIGNS LAUNCHED The Los Angeles Chapter of the American Red Cross and the local offices of the Salvation Army yesterday launched informal campaigns to raise funds for the relief of stricken Florida cities and their inhabitants.

More than \$3,000,000 will be needed for relief work. t was stated at Red Cross headquarters. Quotas have been assigned to all the large cities of the nation, with Los Angeles and San Francisco agreeing to raise \$50,000 | Cold Wave Out each. Citizens of Los Angeles are urged to make their contributions at once, as immediate relief is a paramount necessity.

With no definite quota fixed, and without a formal solicitation campaign, the Salvation Army also is bending efforts to raise money to aid the sufferers. Contributions should be sent to Maj. James Bell, 832 West Ninth street. The executive committee of Hollywood Post No. 43. ## Certified Fig Orchards In the Proven Fig Belt

\$600. Per Acre—Rented for \$2036.

By John E. Kennedy

IN THE Year of Grace, 1905, a California Miracle came to pass.

The Rev. Stephen H. Taft of Sawtelle then transformed a monkey into a "Bear." He burbanked the common Italian Dettate Fig into the delicious American Kadota. He enriched it in Fruit Sugar and Flavor.

He speeded up its Tree growth.

He multiplied its fruitfulness, hardened its fiber and lengthened its Years of usefulness.

Out of the commonplace Dottata he made the Queen of all Canning Figs and then,—his foot alligned.

Being a modest gentleman of Scientific and Spiritual attainments, instead of a "Business Man,"—he named his Creation "Kadota."

Some say he took the "Ka" from Kansas, and the "dota" from Dakota.

Neither of these States grow Kadota Figs,

Now this name "Kadota," being unprotected become common property, like "Casteria."

A NYONE can call his Dottato Figs "Kadota" today.

Anyone can sell White Endich, Verona, White Pacific or Texan Magnolia as "Kadota."

These bear about the same relationship to Kadota Figs that Blackberries or Raspberries

Thousands of Acres are, and will be, planted with trees that are merely First Cousins to Kadota—Second Cousins and Third Cousins.

All can now be LEGALLY called "Kadota."

That name is at the mercy of Chance, of Promotera, Marketeers and Profiteers.

A way should be found to protect the wonderful TAFT strain of true Kadota Figs from supersedure, and from reversion to mere Dottato

So,—with due appreciation to Mr. Taft's really great achievement,—as a Tribute to his

Memory and a Protection to the Public,—we have coined, trade-marked and registered, the name "Taft-ota" Figs, as shown on label above.

Nothing but genuine Taft-lineage Kadota Figs will ever find its way into these "Taft-ota" labeled Cans.

And to fill these "Taft-ota" Cans there is now being planted 216,000 Taft-lineage Trees, in a notable 2000-Acre Fig Orchard called:—

## Exchequer Fig Farms-\$600.

PLANTED in the PROVEN Fig Belt. Practically adjoining the World's largest Peach and Apricot Orchard,—of 4,000 Acres.

That Orchard owned, planted, operated,— and its fruit packed in "Del Monte" Tin Cans,— by the California Packing Corporation, which this year paid 100% in dividends.

Consider WHY the giant California Packing Corporation chose THAT particular locality for its \$2,500,000 Orchard investment?

## MEXICANS ANNUL OLD TREATIES

New Pacts Planned in Line With Liberal Constitution of 1917

MEXICO CITY, Sept. 22. (Exclusive)—So far as is known, Mexico has annulled all old treatles that existed with various governments. These were found to conflict with the liberal

county Board of Supervisors, acting, they stated on legal advice from the District Attorney's office, declared they had no authority to approve Smith's expanses other than a daily wage for actual work done in the courircom.

A question has been raised as to whether Superior Judge Marsh, in charge of the grand jury, has authority under the law to order payment of the grand jury halls, and the jurist has taken the matter under advisement, it is understood, and was quoted as "ready to hear argument on the question."

The significance of the financial question as applied to Smith's bill lies in the fact that Special Atty. Cen. Webb at the request of the grand jury, in presenting evidence, before that body instead of Dist. Atty. Kempley, also has an expense bill that must go through the same channels, not to mention funds needed for further investigation of the asserted graft conditions.

Mrs. Marie 'R. Firman, head of the Los Angeles detective agency that has had charge of the investigation work here sittee last March, made the following statement today:

"My agency took up the investigation of marriving at treaties of amity and commerce with other countries.

Anti-McAdoo Forces Lose in Democratic Meet

Action Reverses Trend at Start of Session

Delegates Lose Tempers in Close State Contest

SACRAMENTO, Dec. 22. (F)—A stormy Democratic convention that swung away from William Gibbs Mc-

Adoc and then swung dryly back again concluded its session here early loday.

In scipting a bone-dry plank, sponsored by the pro-McAdoc contingent among the delegates, the Democratic convention completely upset itself. All yesterday afternoon and part of the evening the faction opposed to McAdoo and accused by its opponents of seeking to swing Callfornia for Al Smith and Tammany had the upper hand, though the margin of votes was narrow. David S. Ewing, a leader of the anti-Modor condidate for temporary chairman of the convention in the afternoon and won the perminent chairmanhip without difficulty in the evening.

Can Save Your Home from Mortgage Foreclosure!

Hove you tgage montgage withousands of rest the high late.

HERE are literally thousands of men and women walking the streets and driving the highways today who anxiously face the approaching date when the mortgage falls due—because they haven't the money to meet it.

If you are one of this number you will be glad to learn that there is "A Way Out!"

In Southern California, there are banded together, under State supervision, 99 well financed, prudently managed Building-Loan Associations, for the prime purpose of encouraging systematic savings, and assisting people to become home-owners, the backbone of the strength of every community.

The Amortized Loan (The Monthly Installment-Loan plan) originated and perfected by the Building-Loan Associations, has enabled us to extend the necessary financial assistance for the building of thousands of homes and the release of many mortgages, the loan being repaid by a series of conveniently arranged installments. That these loans have been a genuine constructive force in community building is evidenced by the fact that today there are a host of men and women who are rejoicing in their ownership of homes which would never have been theirs but for the friendly, financial assistance rendered by the Building-Loan Associations.

Modern conveniences and school facilities fulfill the requirements of home and comfort.

Lake Arrowhead Woods, with lake, Grass Valley golf course, country club, hotels and Norman English village, is a highly developed, though not completed, institution of service to the public of Southern California.

Its contribution to the pleasure and profit of life in the Southland will be appreciated as the years go by.

Its homes are built in harmony with restrictions and architectural requirements.

Homesites are deeded to purchasers, but title to trees remains with the Title Insurance & Trust Company as trustee.

Trees and scenery are preserved.

It is a delightful place to have a home—up on top of the world-a mile high-with the woods and the lake, the birds, squirrels and deer-with wonderfully blue sky and constantly changing scenes and scenic effects-with all the spirit of the seasons in nature's own garden, and an always mild temperature.

Think of Thanksgiving and Christmas in these homes of Norman English architecture, great fire places and log fires.

Think of the appeal of fall and spring in the woods, of the cool restfulness in summer, of the scenic beauty and winter sports when the white mantle falls.

In a short drive or walk you can look out over the world's inspiring panorama of mountains and plains, desert and ocean—the ocean 85 miles west and the Mohave Desert and distant ranges in the north.

It is a feast for the soul—uplifting, inspiring, strengthening.

FALL IS DELIGHTFUL IN THE WOODS. Go often. Go north on Arrowhead Avenue from San Bernardino. Take the grade in Waterman Canyon leisurely—in lower speeds. Stop and enjoy the ews. Road is wide, smooth and oiled. American and European plan hotels, cottages and cafeteria. As modern as you wish.

Convertible at any time prior to redemption or maturity into no par value \$7 Cumulative Prior Preferred Stock on basis of one share of such stock for each \$100 par amount of Debentures.

Mr. Marshall E. Sampsell, President of the Associated Telephone Utilities Company, summarizes from his

letter which gives detailed information, as follows:

CAPITALIZATION—CONSOLIDATED STATEMENT

Commonwealth Telephone Company First Mortgage 5 s, 1945 .
Associated Telephone Company Mtge. and Coll. Trust 6s, 1950 . \$325,000 257,000 Minority Stock in hands of public .
Fifteen Year 6% Convertible Gold Debentures, Series A, 1941 (this issue) . 10,128 shares

BUSINESS: The Associated Telephone Utilities Company, incorporated in Delaware, controls through stock ownership a group of public utility properties serving without competition a total population in excess of \$20,000 in California, Wisconsin and Illinois. The subsidiary companies are engaged primarily in the telephone business, operating 35,764 stations having toll connections with the Bell System.

PROPERTIES: The principal properties consist of independent telephone systems serving at the present time 35,764 stations. These properties are all in excellent operating condition. Those in Long Beach and San Bernardino, California, are practically new as Long Beach was changed over to full automatic service in 1922 and San Bernardino in 1925. In each of these cities the operating Company owns new central office buildings which were built with the idea of providing for the substantial increase in business anticipated. buildings which were built with the idea of providing for the substantial increase in business anticipated during the next five years. A new central office building was completed and equipment installed in Belvidere, Illinois, a few months ago and in Mineral Point, Wisconsin, in 1924.

EARNINGS: Consolidated net operating revenues of the subsidiary properties before depreciation were \$554.733, or more than twice total fixed charges, including the annual interest on the \$1,500,000 Debenture 6s and allowance for the minority stock interest. The balance after payment of interest and amortization charges on subsidiary company bonds and after allowance for the proportion of surplus earnings accruing to minority stock holdings was \$368.769, or more than four times the annual interest charge of \$90,000 on the \$1,500,000 Debenture 6s due 1941.

TERRITORY: The California territory includes the cities of Long Beach, with a present population of about 125,000, and San Bernardino, with a population of about 37,000. Both cities are primarily residential but also contain substantial industrial interests. Long Beach is the center of a rich agricultural territory and San Bernardino is in the heart of the citrous fruit country. In the Wisconsin and Illinois territory the chief characteristic of each of the cities served is that it is the center of a very prosperous agricultural community devoted to a large extent to dairying and the raising of live stock.

EQUITY: These Debentures will take precedence as to assets and earnings over 10,128 shares of no par value \$7 Cumulative Prior Preferred Stock and 34,300 shares of Common Stock. The replacement value of the properties, less depreciation, is substantially in excess of the funded debt and the outstanding \$7 Cumulative Prior Preferred Stock.

FRANCHISES: The subsidiary properties are operated under valid franchises and rights. In the opinion of counsel, the franchise situation is satisfactory and imposes no burdensome restrictions upon the Company. The subsidiary companies operate under the supervision of state regulatory commissions.

ILLINOIS MERCHANTS TRUST COMPANY, CHICAGO, TRUSTEE

Mr. Jos. W. Evans, President of the Corporation, summarizes his letter as follows:

BUSINESS: The Manchester Terminal Corporation BUSINESS: The Manchester Terminal Corporation will own and operate the largest cotton warehouse and compress in the Houston district and will also furnish general wharf and storage facilities. The need for this terminal has been created by the steady growth of the cotton and general shipping business at Port Houston. The project is now 65% complete and the finished units are already receiving cotton for storage.

The Corporation will not own, buy or sell any cotton, but will handle, store and compress it for shippers and growers, charging for these essential services fees which are paid before the cotton is delivered from the terminal. Thus the business will be on a strictly cash basis. The fees to be received by the Corporation are analogous to freight charges and, like them, form only a small percentage of the total commodity value.

The Corporation has contracted to handle for two years the entire crop of the Oklahoma Cotton Growers Association and is is estimated that this service will require one-half of its plant capacity. Heretofore, the production of the Oklahoma Cotton Growers Association has not been handled at Edouston and the need of this association for a single plant large enough to handle its cot-ton was one of the factors that led to the organization of the Manchester Terminal Corporation.

TERRITORY: Houston is the largest inland cotton market and one of the largest cotton export points in the United States. Texas is by far the greatest cotton-growing State in the United States, while, in total production during the past three years, Oklahoma ranks second to Texas alone. Recent Government forecasts give these two States 43% of the 1926 cotton crop of the United States. In addition, Houston leads in the export of cottonseed cake and meal and is the clearing point for a large volume of miscellaneous commodities for both export and import trade.

PROPERTIES: The Corporation owns in fee 70 acres of land, excellently situated on the south bank of the Houston Ship Channel, at its junction with Sims Bayou. Here the Corporation is erecting a modern cotton warehouse of 200,000 bales capacity, of reinforced concrete construction, to be equipped with high density compresses, and with all necessary equipment for han-

dling cotton and other commodities. The present construction will occupy about 25 acres, leaving unparation for future expansion.

Excellent shipping facilities will be provided, as to Corporation will own and operate a concrete wharf ISM feet long, permitting ocean shipping to doct dised; it plant. The Corporation's private tracks will cover the lines of the Public Belt Railway of Human with the network of seventeen railroads radiates has Houston.

SECURITY: These bonds will be secured in opinion of counsel, by a direct first nortage or the property of the Corporation. The land is appraised at \$840,000 and Ford, Bacon & Dark estimate the reproduction cost new of backers are purposed in the secure of bonds thus is less than 55% of the total value of \$4,917,600.

EARNINGS: The average annual pet earning est, sinking fund and reserves are conservatively
ed by Messra. Ford, Bacon & Davis, Inc., E
be \$351.300, or 3.14 times the maximum
est requirement of this issue.

MANAGEMENT: The General Manage, R. D. Ernst, has for the past five years successfully the operations of the Savannah Warehouse to Co., at Savannah, Georgia, similar in size was ter of operations to the properties of the Committee of the Committ

SINKING FUND: The mortgage will provide to minimum annual cumulative sinking fund of \$90.00 the first payment to be made October 1, 1928. The the operation of this minimum sinking fund it is also prior to maturity. It is also provided that 25% at earnings, as defined in the mortgage, are to be said the sinking fund.

EXEMPT FROM PERSONAL PROPERTY TAX IN CALIFORNIA

Unconditionally Guaranteed as to Payment of Principal and Interest by Edwards & Wildey Company Which Has a Net Worth in Excess of \$2,000,000.00

Mr. Godfrey Edwards, President of the Company, summarizes as follows concerning the Figueroa Street Company and this bond issue:

BUSINESS AND PROPERTIES: The Company was recently incorporated under the laws of California for the primary purpose of acquiring, owning and operating business properties. It has recently acquired under leases running to the year of 2019 a parcel of Los Angeles real estate having a frontage of 220 feet on the East side of Figueroa Street, extending the entire block from 21st to 22nd Street, and having a depth of 180 feet. This is now being improved with a 3-story Class "A" store and loft building to cost, including carrying charges, at least \$325,000.00. One-half of the building has been leased for 15 years to Maddux, Inc., exclusive dealers in Los geles for the Lincoln Division of The Ford Motor Company, manufacturers of the well known line of "Lincoln Eight" automobile. Negotiations are now pending covering the leasing of the remainder of the building to another automobile distributor. The district surrounding this property is being rapidly developed and within a radius of two blocks are such well known organizations as Wm. E. Bush, Pierce Arrow Distributors for Southern California; The Paige Company of Southern California; Automobile Club of Southern

California, etc.

PURPOSE: The proceeds of these bonds will be disbursed by the Trustee wholly for the construction of this building only after. the Company has previously expended for such construction the difference between the cost thereof and the amount of the bond pro-

SECURITY AND GUARANTEE: These bonds will be secured by a Closed First Mortgage on the leasehold estate, including the building, hereinbefore mentioned, and will be unconditionally guaranteed as to payment of principal and interest by Edwards & Wildey Company, which has a net worth in excess of \$2,000,000, and is one of the largest owners and operators of business and subdivision properties in Southern California. This firm will own the controlling interest in the common stock of the Company, and the building will be under its management. A Bondholder's Policy of Title Insurance for \$175,000 issued by Title Guarantee & Trust Company will be deposited with the Trustee.

INCOME: Net annual income based upon the Maddux, Inc. lease and leases now under negotiation, after deducting all operating expenses including ground rent, taxes, insurance, etc., is estimated to be more than 21/2 times the maximum annual interest require-

These bonds are offered when, as and if issued and received by us, and subject to: change in price, prior sale, securing the approving legal opinions of Mesers. Chapman & Chapman and Mesers. Gibson, Dunn & Crutcher, Attorneys, Los Angeles, and Permit from the Corporation Commissioner of the State of California. The terms and conditions of the issue as herein set forth are subject to such changes as the Commissioner may require.

### COTTON MARKET

NEW YORK, Sept. 22. (Exclusive) The cotton market made a raily of 10 to 12 points in the early trading from yesterday's closing quotations on the better Liverpool cables than the over night. There was a covering movement of shorts in futures there on somewhat better buying by trade interests and continental operators, with also better news from Bombay.

## **GUIDING INSURANCE BUYERS**

BY GRIFFIN M. LOVELACE

This is one of a series of articles dealing with all phases of insurance. The subject of the next article by Prof. Lovelace will be "Anguities for Business Women." LXIX-THE INCOME BOND-A REFUND DEFERRED LIFE ANNUITY

show because a liberal setter any values decreased, turning to the burning for the posts and made the final first form of the property of the

ceived, if death occurs after the annuity payments have started.

PLANS COMPARED

It is probable that the "income bond" would make a stronger appeal to many of you than the straight deferred annuity, though a comparison of rates would, no doubt, decide some of you in favor of the deferred annuity without refund.

For example, at age 40, a certain company quotes a "male" rate of about \$200 a year for a straight deferred annuity of \$100 a month starting at age 55 as compared with about \$281 for an income bond for the same amount to begin at the same age. In this case, the latter rate is nearly 50 per cent greater than the straight deferred annuity rate.

The increase in rates is purely a matter of providing in the income bond for a benefit which is not assured in the straight deferred annuity; in addition to providing payments each year to each survivor, the income bond must also provide for certain payments at each death, viz., the amount of the premiums paid, if death occurs before the annuity begins, or the excess of premiums over annuities received, if death comes after the annuity has started.

The income bond offers wonderful possibilities for those of you who are still young and are willing to save a little more money than you are laying aside at the present time. For example, a man 20 years old may get assurance of a life income of \$100 a month, \$1300 a year, starting at age 65, by payment of a premium of only about \$55 a year.—i.e., a saving of about \$7 a month will guarantee a life income from age 65—the usual retirement age"—of \$100 a month.

EARLY AGE BEST

of about \$7 a month will guarantee a life income from age 60—the usual "retirement age"—of \$100 a month.

EARLY AGE HEST

Of course, any age up to 50 or \$5 is a good age at which to start an income bond, but it is best to begin as young as possible, because the anincome bond, but it is best to begin as young as possible, because the anincome bond, but it is best to begin as young as possible, because the anincome bond, but it is best to begin as young as possible, because the anincome in a singuificant and is gladly carried to completion.

Another distinct advantage in purchasing the annuity at an early age is that for a given annual premium you can have your \$100 a month annuity begin at an earlier age. A man \$5 years old will require about \$200 a year to secure an income bond of \$100 a month starting at age 65, whereas for approximately the same premium (only about \$16 a year more) the young man 20 years old can have his income of \$100 a year more) they young man 20 years old can have his income of \$100 a month start ten years earlier, i.e., at age 55.

Pathers, who know so well the advantage of having an assured income in old age, would do well to purchase for their children as early as possible an income bond for \$100, \$200, \$500 or \$1000 a month. If they will only pay the moderate premiums for a few years until their sons are earning their own living, and then require them to assume the premium payments themselves, they will in this way not only teach a lesson of foresight and thrift, but will also lay the foundation for a comfortable old age which will always be greatly appreciated.

In the death of Harry E. Andrews, long managing editor of The Times, this newspaper and the community have suffered heavy loss. To those who worked with and under him during the twenty years of his active service with The Times and who knew him intimately, is added a poignant sense of personal beneavement. Because of this and because of the many-sided versatility of his character, appealing variously to his associates, The Times has substituted for the customary impersonal editorial tribute the following symposium of personal appreciations from a number of Times workers who knew Mr. Andrews best:

Pastor Launches Drive for Funds; Two Tell Keyes Evangelist Was Companion of Ormiston

Aimee Semple McPherson yesterday suggested to her followers at Angelus Temple that they spend forty-eight hours of fasting and prayer in her behalf in launching her campaign for funds from the public with which to defend herself at her preliminary on Monday on felony charges. More than 3000 men and women were seated in the Temple for the afternoon "healing service" when the evangelist put forward this suggestion.

Abandoning her former bitter characterization of the proposed solicitation as a "Fight the Devil Fund," Mrs. McPherson yesterday referred to it simply as the "Aimee Semple Mc-

Throughout this great trial which

persecution and false accusation.
However, we are assured that now a

The Managing Editor of The Times.
I did not then even know Mr. Andrews's name.

What Harry E. Andrews did to that little article make it glow with vitality, made it beautiful with sentiment and timely with accurate and correct allusions. Many have told me since they cut it out and have filed it away among prized newspaper elippings. And the credit was his. To his editorial faculties and perceptions belonged all the virtus.

Subsequently as a Times employee, I came to know Mr. Andrews well, professionally. I have often seen him less to topy. He did it with an independent of the paper. We knew that HEA knew what he wanted and that he had a good reason for wanting it, and also that if he didn't get it there would have to be a mighty good reason for not giving it to him.

Mr. Andrews understood type and what it could be made to do as well as he understood men, and this understanding made a perfect and result-greating contact between the editorial room and the composing room where the paper is assembled.

I desire to add my own testimonial to the composing promited the made to do as well as he understood men, and this understanding made a perfect and result-greating contact between the editorial room and the composing room where the paper is assembled.

WAR AND PEACE
Germany gave to the world Nietssche,
creator of the blonde beast, the tawny suerman that lived through plundering less er breeds. According to the Nietzschean theory war was an indispensable athletic exercise for sturdy races. If wars were to ease, the red-blooded peoples would pass

And Germany has given to the world a Munich philosopher, Dr. Eric Becher, who told the assembled delegates at the recent Congress of Philosophy at Cambridge that the Nietzschean theory is all wrong, that war wastes the best blood of a people, that, whatever the territorial advantages gained, they cannot compensate for the loss of sturdy manhood.

Nietzsche was the creature of his perio and environment. He was one of the German invaders of France in 1870. He was one of millions captivated by the Bismarck policy of blood and iron, and he saw in the next generation of his people a race "Beyond Good and Evil." Some races were born to rule and others to serve, and the rulers should waste on the maudlin sympathy.

Great was Nietzsche in the first decade of the present century. His works were translated in a dozen foreign languages. Their circulation and their influence were enormous. But the coming generation of which Nietzsche wrote failed to maintain its place as one of the dominant peoples. The teeth of the blonde beast were pulled in the World War and its claws were pared.

And from this generation arises one who is an apostle of peace, who would destroy the warlike breed, who would put a store to the killing of men from purely political motives. Dr. Becher expounds a philosophy more in keeping with the spirit of the times; and it is significant that the same race which gave Nietrsche has given an-other whose theory is an almost total con-tradiction of the Nietzschean philosophy.

by tradiction of the Nietzschean philosophy.

Dr. Becher came across the Atlantic to propound his theory at an international conclave. It augurs well for the peace of Europe if his philosophy is symbolical of the new spirit east of the Rhine. At that conference he found representatives of few war-hungry peoples. The game has become tone coulty, too professionalized and too deadly to retain its former hold on the world. The present generation is better prepared than any of its predecessors to give a symmathetic ear to the doctrine of government is said to have forbidden the give a sympathetic ear to the doctrine of peace. Education has dispelled many of martiest, unhealthful dance. The Mexican done show moments of real illumination at times. by the sword.

There is no more enthusiasm for the Nietseche theory that the weaker are al-ways in the wrong, that the only existing right is that of the strongest. Destiny perhaps only another name for God—placed the strong and the weak side by side on the earth; and gave to every race an inner consciousness which warns that a wrong supported by force does not become a right.

The farmer "deserves a place in the sun," snorted a political orator. It has been our experience that the farmer would be more grateful for a cool place in the shade. He is pretty badly sun-burned already. What the orator realty meant was that he himself wanted a place in Congress. but, once the conversion has taken place, the leaders and instructors of the genera-tion must be slert to prevent any falling

Things have come to a pretty pass, and intervention is talked of more strongly than ever.

In a mild sense the British have been placated by the return of the steamers seized by Gen. Yang Sen, but as all foreign warships have been ordered out of Hanis ire still runs high. All these hostile acts are in distinct violation of treaty obtain feel that their relations with Peking are strained to the breaking point.

To make matters worse, from the American point of view, the city of Wuchang has been completely shut off from the outside world by the unrelenting stege of the Red Cantonese army and great anxiety is preciate the significance of it.

the Editor of The Times:] I wish to express my very high appreciation of the fine report of the discussion before the City Club last week on the right to read the Bible in the public schools.

It is very evident from the admission of speakers on both sides of the question that the great need of our day is better fathers and mothers; for without better fathers and mothers; for without better fathers and mothers we cannot get better boys and girls. It did not seem to occur to one of the speakars that the way to get better boys and girls. This is absolutely essential. How can this be done? It is clearly illustrated in the work of the State upon the subject of education. Because a great many fathers and mothers were not wise and good enough to send their children to school for an education which is essential to a democracy, the State passed a compulstory education bill. For what purpose? To make better boys and girls in order that they should be better than their fathers and mothers.

Every recognized political philosophy says that the State may do anything except commit crime. If the State discovers that there are thousands of fathers and mothers not wise enough to teach their children good morals the State will be compelled to provide such moral fasching in order to make better fathers and mothers and preserve democracy.

Against Foreign Missions
LOS ANGELES, Sept. 20.—[To
the Editor of The Times:] I was
once a contributor to foreign missions, but never again. Our missionary work has been a failure
and has only instigated trouble.
Let our missionaries return home
and let foreigners live peacefully
with such religious conceptions as
they possess. In all sincerity I
believe this would be best for the
world. There are many religions
and no one can prove that any is
other than the work of man, so
why try to force our religion on
others. They will be happier and
more contented if we do not interfere and our government will avoid
much obloquy and possible wars
by letting other peoples alone in
their beliefs.

Prohibition Saves Lives OS ANGELES, Sept. 10.-LOS ANGELES, Sept. 10.—(To the Editor of The Times:) I thought in the early days of prohibition it was a good thing and I think so now. I have lived in Los Angeles thirty-six years and in the old days, when there was a saloon in every block, you would see one or more drunken men on every block. Put those drunken men, with twice as many half "lit up," on automobiles, what kind of a mix-up would we have?

O. Allison Phelps, radio philosopher, chose as his subject, "Garbage Cans." This, as most of his subjects, is unique in itself, and one wondered what it would all be about. There were many splendid ideas crowded into the brief talk. He spoke of the garbage can as the receptacle of refuse, and compared the minds of many people to it, in that they poured into their minds the rot and refuse which should have no place in it.

Among the subjects upon which Mr. Phelps has spoken in the past QUARTET SINGS There were sciections by the Fire Mike Donovan, baritone; violin duets by Harry L. Hanson and Emil Sasina; piano solos by Officer Earl H. Cooper, who gives our "Safety First" talks each nooh, and George Contreras, chief of the county dry squad. Art Meyer, baritone, sang several popular songs which were enjoyed. The second half of the evening's

refuse which should have no place in it.

Among the subjects upon which Mr. Phelps has spoken in the past have been "Hot Needles," "Hash," "The Neek of the Turkey" and many others just as unusual, each one carrying a real message.

Harold Moses, known as "the ukulele king" certainly gets a lot of music out of that little instrument. Dr. Mars Baumgardt gave his weekly talk on the stars, preceded by the Scripture reading which was given by Dr. Harcourt W. Peck, pastor of the Central-avenue Methodist Episcopal Church of Glendale.

mcnths! Hatch was so busy answering the floods of requests that came in that he had no time for new things. The old things that no one but Hatch can put over were done in the old way, much to the delight of his big audience. "The Old Town Hall" came in for its share of glory, as did many of the other old standbys which Hatch's friends expect him to do when he is on the air.

DICK SEES MISS JANIS
Dick Winslow came to the children's hour full of his interview with Elsie Janis, and told his friends all about it. The ability of this lad to tell without heaitation, and in fine, force-cul American of his interviews and experiences is a remarkable thing.
For a young girl to play the 'cello as does Margaret Smith is unusual. Last evening she gave two numbers on the twilight hour program which were most enjoyable—"The Palms" by Faure, and "Bomewhere a Voice Is Calling."

were most enjoyable—The Palms by Faure, and "Somewhere a Voice Is Calling."

Earl Voorhees, 13 years of age, gave a charming interpretation of Debussy's "The Little Shepherd." Patricla Eccleston, "Little Daffodil," told a Peter Rabbit story about "The Seifish Fox." It was a long taie for such a little girl to remember. Glenn Pitz gave his readings in his own sweet way. Dorothy Dodge, accompanied by her mother, sang "The Swing." and "My Bed is a Boat." Her recitations included "A Little Bird at My Window," written for her by Rosa Frances Keppel, "Pairy Godmother of KHJ." Vivian. Marple, "Slue Beil of KHJ" also entertained her friends.

The station was on the air yesterday afternoon with the weekly mesange of Fred C. McNabb, vice-president of the Aggeler and Museer Seed Company, who answered questions by the score pertaining to planting, pruning and care of gardens.

The noon program was given by LeRoy Parry and his orchestra, who played the latest in Jazz.

At 11 the studio day closed, after an hour of dance music by Jerry Grant and his orchestra.

A recent visitor in our studio was

J. Walter Leopold, song writer, who is
the composer of such hits as "Is Is a

"My Pal and Me." Mr. Leopold
played and sang his compositions delightfully. He co-starred with Emma

Jean Hersholt With Fox?

There is a strong probability that Jean Hersholt may be signed for the leading role in the Fox film version of "The Music Master," the part which David Warfield made famous on the stage. This fact leaked out yesterday. Universal is asking \$5000 per week for his services.

I present Hersholt is playing in "The Wrong Mr. Wright," and he and his director, Scott Sidney, and leading lady. Enid Bennett, are to go north today to make some additional scenes for the picture.

Lonsdale te Write Mevies

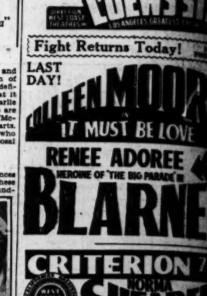

Whether subtlety gets over on the screen or not the fact remains that Prederick Lonsdals, noted playwright, author of "Spring Cleaning." The Last of Mrs. Cheney" and other successful plays, will soon be in our midst. And it isn't alone as a change from the London climate that he is coming to Hollywood, either.

The author has signed with Paramount to devote his writing talents to the screen, and under the terms of his contract will write six original scenarios.

At present Lonsdale is in New York, where he recently arrived from England. He is to produce a new play for Charles Dillingham before coming to Hollywood.

It is said that the playwright and the stoney like a slave during to more than the sound of the playwright. Butter Keaton and his company of United players returned yesterday.

SIGHT VICTORY River Basin People Think Los Angeles Defeated

Experiments Made to Decide Question of Rights

Contentions of Association Declared Proved

VENTURA, Sept. 22.—Victory for water users in the Santa Clara River basin is predicted in some quarters here following experiments just made under the supervision of the State Department of Water Rights, engineers and legal adviser representing the city of Los Angeles and the Santa Clara River Water Pro-ective Association relative to the San Prancisquito dam. These are said to have proven the ontention of members of the latter association that none of the latter association that none of the water can be taken away by Los Angeles without injury to the land interests in the Santa Clara Valley unless the gravel basins are already full of water.

The experiments just concluded were made following a hearing before Commissioner diatt of the State Division of Water Rights, when the Santa Clara River Water Protective Association protested against an application of the city of Los Angeles to take water out of San Francisquito Creek, contending that the wa-

## Loans That Never Fall Due

Our method of loaning money offers you a safe, economical way to finance your home. It relieves you of the tremendous worry of how to pay off or renew your loan. For our loans do not fall due. Complete repayment is arranged for in the terms of the loan by requiring definite monthly payments.

This system of monthly payments helps you to clear up the loan without any great financial strain and its saves interest. You make the size of the payments fit your circumstances. The saving in interest is due to the fact that you pay interest only on the amount of the loan still due-and that is constantly growing less with each monthly payment. It is much cheaper and better to pay a little on the principal every so often and not so much interest.

We loan money only on improved residence property. If you want to build a home, or borrow money on improved property for any legitimate purpose, a loan from us. will be of real help to you. Call or write for full information.

State Supreme Tribunal Gets Venice Problem

Deeds Declared to Prohibit Use as Roadways

City Contends Public Needs Now Have Changed

The validity of the plan to fill the canals at Venice to make streets for vehicular traffic was preted here yesterday to the State Appearing on behalf of Floyd A. Schultz, a resident of Venice, Attor-

ney R. W. Griffin argued that the deeds conveying the title to the canals to Venice dedicated them for-ever to the public solely for use as

waterways. He held that it would be illegal and would void the deed to convert them into highways. Deputy City Attorney Green declared that public convenience and necessity require the canals to be filled for street purposes. He said that the mode of travel has changed from boats and canoes to automobiles since the deeds were written, and the change would be for the good of the public. The public still will get the benefit of the gift if the canals are filled, he declared. The case was submitted on briefs.

canais are filled, he declared. The case was submitted on briefs.
The court granted F. S. Reese permission to file a petition requesting a rehearing of the recent community-property law decision. In the decision the court held that a wife has no vested interest in community property in California. Recee's petition is the eleventh to be filed since the decision, which was the result of a test suit brought by Ernest Stewart, head of the California Taxpayers' Association, who sought a decision giving one-half vested interest to wives.

Candy Factory Cloak Put Over Operations

Elaborate Equipment Called Finest Ever Taken

A mammoth two-column still that dwarfs any illicit contraption of its kind ever seized on the Pacific Coast,

dwarfs any illicit contraption of its kind ever selzed on the Pacific Coast, according to dry officials, was found yesterday by Federal prohibition agents in the abandoned Gunther. Candy Factory in Venice on Venice Boulevard one block east of the police station.

Agents penetrated camouffage of several hundred sawdust-filled flour sacks, empty candy boxes neatly piled to form a wail, and dry-goods containers, in gaining access to the innermost recesses. Here the alcohol plant that was operated by steam and electricity reared its twin spouts cellingward for thirty feet.

Their entrance to the mystic chambers of the white-brick building that was stripped of its candy manufacturing machinery four years ago also occasioned the discovery of five fermentation wats capable of Bolding 28,000 gallons of mash, sixy gallons of alcohol, twenty-four fifty-gallon barrels of moiasses—the base of the alcohol production—and 210 fifty-gallon barrels that reeked of more molasses, but held only a few pints.

Robert Sterling, newly appointed acting chief field agent, directed operations, and, in his opinion, the distillery last was operated on Sunday, Informants supplied facts on its presence and reported that it had

ing at the factory in crates disguised as chinaware.

Fifteen heavily armed dry operatives swooped down on the plant early in the morning and attacked front and rear doors with battering rams. Rumors that a strong guard of gangsters had been pisced about the structure necessitated utmost calltion at first, but the final outcome revealed every bird had flown. Dismantling was begun immediately and secret-service agents were put on the trail of a purported wealthy liquor ring that rented the building under the guise of warehouse owners.

Donald Kortangen, 21 years of age, known in boxing circles as "Knock-out Keily," yesterday pleaded guilty to a manslaughter charge in connection with the death of Christie L. Blackmore on October 27, last. The prisoner was arraigned before Superior Judge McLucas. While Kortangen was allowed to file a petition for probation, it is believed the prayer will be denied and that sentence will be passed within a fortnight. Kortangen was arrested on November 20, last, as one of three men who had beaten and fatally injured Blackmore after an argument as to which automobile had the right of way—one in which Blackmore had been given a lift, or that in which the trio was traveling. In the altercation, Blackmore was hurled to the pavement, suffering a skull fracture from which he died. Kortangen was released for want of evidence against him at the time.

He was taken into custody again on February 9, last, on a murder charge; yesterday morning the charge was made one of manslaughter and Kortangen answered guilty.

The case was handled by Dep. Dist.-Atty. Costello.

prisoners were booked for rivestigation.

The night of the 30th inst, the detectives say, three men went to the
apartment of R. C. Foster, 310 North
Ardmore avenue, and told him they
were officers searching for liquor. He
told them he had none and let them
search, and they went away with
apologies after taking a ook though

IS RED GRANGE IN TOWN?

I want to reach a fouch of young fellows of the Red Grangs type who will go out and get baseliness because they just have to get it. I have a force now which I have built up from hist this kind of material, and I have paid the boys around \$46.000 commissions in the last four months. I have been to the last four months. I have been the last four months in the force and there is, therefore, a chance for some real hard-hitters who want to go out and make 1100 or more per week through their own efforts, with my help and leads. There is no reason \$1500 or more per week through their own efforts, with my help and leads. There is no reach and leads. There is no reach and if you work hard enough. Many of my keys have done that in recent mosths. Come in this room, and ask for MR. GORMAN, 725 So. Spring St.

YOUNG DEPOSED AS TRACK HEAD

Culver City Speedway Board Members Replaced Stockholders' Action of Last

August Revealed Officials Refuse to Discuss Significance of Move . .

A. M. Young, president and general manager of the Culver City Speedway, together with all but two of his cial capacities, it was disclosed yes-

erday.

A new board of directors, which in-A new board of directors, which includes two of the former board memcers under Mr. Young, is now in
charge of the track and has been for
about a month, it was revealed.

As yet, however, no president of
the Speedway Corporation of Los Anreles, which operates the track, has
been selected.

C. M. Puller, president of the Richfield Oi! Company, was elected to the
presidency during the unexpected recreanization meeting of the stockholders last August. Mr. Fuller was
out of the city at the time and upon
his return announced that he would
refuse the presidency of the speedway.

his return announced that he would refuse the presidency of the speedway.

As at present constituted the board includes Mr. Fuller, John C. Stick, attorney, A. T. Mathers, G. E. Moreland Thomas Haverey, James English and Art Klein.

The old board, turned cut by the stockholders was headed by Mr. Young as president, Mr. Fuller as vice-president, R. C. Durant, J. M. Danziger, A. C. Pillsbury, J. E. O'Rourke and Mr. Stick.

Both Mr. Young and Mr Puller refused to discuss the matter yesterday.

Mr. Fuller, however, admitted that the corporation is in the process of reorganization and refinancing and that Mr. Young was not connected with it any longer in any official capacity.

Mr. Young organized the corporation and established the Culver City (see trace in December, 1924, de also was organizer and general manager of the Beverly Hills Speedway which was completed in 1920. The Culver City track has become one of the most important tracks in the country. Young is rationally known as a race-track efficial and promoter.

INDIVIDUAL SIZED

UP BY HIS HAT

A careful comparison of hats worn by many men of different walks in life—hats left in a store when new ones are bought-shows among other things, that a man's hat, more read-

ones are bought—ahows among other things, that a man's hat, more readily, perhaps, than any other article of wearing apparel, becomes definitely individualized. For instance:

A straw hat that has been worn even a few times will bear on its brim—or on its brim and crown—marks that show clearly if a man is right or left handed. Each time a man puts en or takes off his hat, he leaves a fine impression of his fingers that could be caught by microphotography. Observations of a group of men in the same office showed that all handle their hats in slightly different ways.

The contour of the inside of the hat crown and brim, particularly in warm weather, soon adapts itself to the contour of its weare's head. The perspiration line on the aweat band shows dearly the configuration of the forehead.

In a straw hat, the crown lining will frequently show if a man has a heavy growth of hair, or if he is among the baid or nearly bald. There may even he small hairs adhering to the hat, as at the foint of the sweathend, at the back.

Simel is another point that might well slid the detectives. If a man uses hair tonic or oil, it does not need a bloodhound to tell it.

To wander into the leas obvious fields, if the has hat he search for the district in which its wearer lives may be at least restricted in scope. Chemical snalysis of the dirt adhering to the hat still uses coal.

Man is so restricted in his choice of wearing apparel that his hat is one of the few means by which the conservative citizen may express individuality—and the hat responds quickly by reflecting that individual-type in the foreign of the doesn of ways of which its wearer does not dream.

FOUND A BARGAIN

Four children were selling lemonade on the street. Two had a stand on one corner and were selling their lemonade at five cents a glass. Two more children had a stand on the other street corner, and were selling their lemonade at two glasses for five cents.

A woman who was very stingy and always looking for a bargain came along and took two glasses of the lemonade for five cents. After drinking the lemonade and said: "Children, four 'lemonade is very good, why are you selling it cheaper than those other children are selling theirs?"

One of the children promptly replied: "Well, you know our little dog fell in this bucket of lemonade and that is why we are selling it cheap."—[Indianapolis News.

> You'll find them in two places

That's always been true, -now it's more conspicuous than ever. We stepped right on the heels of the last drop in textile prices. We bought cloth for production at once, months before the average clothing maker would be clear for new buying. We got carload lots, in many cases, of the identical fabrics, which had been built into clothes now
